WELCOME

It is our pleasure to welcome you to our PhD Programme in Economics Faculty of Economics and Business, Universitas Diponegoro (well known as PDIE UNDIP). By joining our PhD Programme you have become member of creative, innovative, and transformative community that excels in research and teaching activities. Faculty of Economics and Business is one of the most research-intensive faculty in the Indonesia, with the majority of research activity recognised as internationally excellent. Our international publications have contributed to the achievement of the University in the international university ranking ([the Faculty of Economics and Business is included among the 600+ of the Time Higher Education-THE World University Ranking-WUR in 2021](#)). Furthermore, considering the international publication ranking (the 2021 SCImago Institution Rankings), [the Faculty of Economics and Business is ranked 7th \(Indonesia\), 146th \(Asia\) and 588th \(World\) in the subject of Business, Management and Accounting](#).

Our Doctoral Program in Economics offers three major concentrations: Economics, Management, and Accounting. As a PhD student of the Faculty, you will experience both close supervision by a group of our faculty members that specialises in your research area. You will also have the opportunity to participate actively in various academic activities (such as doctoral colloquium, seminar series, workshops and conferences), and interact with well-established scholars in your field. The ultimate objectives of PDIE is to prepare you for a successful research-driven career in academia or in government, research organizations, and business enterprises. This Handbook depicts the structure of the PhD program and provides useful information on other aspects of your studies. You should read it carefully as it contains most of the information that you will need to get started, and it can also be a useful reference in the future.

Welcome and best wishes for successful doctoral studies.

Professor Suharnomo
Dean

Professor Anis Chariri
Chair of Doctoral Program
in Economics

DOCTORAL PROGRAM IN ECONOMICS

HISTORY

Doctoral Program in Economics, Universitas Diponegoro (well known as PDIE UNDIP) is a research-oriented degree program designed for candidates with prior research and training in economics, management, and accounting with strong analytical and critical components, who wish to prepare themselves in teaching and research in academia or for responsible positions in government, research organizations, or business enterprises. This program offers three concentration (study major): economics, management, and accounting can be taken by either Doctor by Courses or Doctor by Research (full research). Upon its completion, candidates are awarded a PhD degree for producing a doctoral thesis of high-quality, original, and publishable research over a period of three years

PDIE was officially established on March 11, 2002. The establishment of the PDIE is based on the Letter of the Directorate General of Higher Education, Ministry of Education and Culture No. 497 / D / T / 2002 dated March 11, 2002 concerning the Permission to deliver doctoral program in economics at Universitas Diponegoro.

PDIE UNDIP since its establishment offers three concentrations: Economics, Management, and Accounting. Until now PDIE UNDIP has been accredited A (Excellence) by the National Accreditation Board for Higher Education (BAN-PT) as stated on the Decision Letter of BAN-PT Number: 2063 / SK / BAN-PT / Ak-PPJ / D / IV / 2020.

Campus Address:

Jl. Erlangga Tengah 17 Semarang, INDONESIA 50241, Phone: 024 8452269

Email: admisipdie@live.undip.ac.id

Website <https://pdie.feb.undip.ac.id/>

VISION AND OBJECTIVES

PDIE UNDIP is part of the Faculty of Economics and Business, Universitas Diponegoro with a vision: "Entrepreneurial faculty with a leading role in transformative development through research, learning, innovation, and collaboration in economics and business". The vision and mission of the Faculty of Economics and Business is in line with the Vision and Mission of Universitas Diponegoro, which is also carried out by PDIE.

PDIE UNDIP Vision:

A leading doctoral program that provide freedom of creating and developing creative, innovative, and original thoughts to maintain the sustainability of knowledge and to solve problems in economics/management/ accounting with national and International recognition.

PDIE UNDIP Objective:

The main objective of PDIE is to produce creative, innovative, and transformative graduates capable of developing and disseminating knowledge and solving problems in economics, management, or accounting through interdisciplinary, multidisciplinary, or transdisciplinary approaches. Graduates of the program are hoped to be recognized nationally and internationally.

Based on the National Standards for Higher Education (*Standar Nasional Pendidikan Tinggi*) and The Indonesian National Qualification Framework (*Kerangka Kualifikasi Nasional Indonesia-KKNI*) level 9, the above objective will be achieved through the following learning outcomes:

- a. **Research Skills:** students are trained to become innovative and transformative researchers who are capable of gaining national and international recognition due to their ability to produce high-quality, original, and publishable research for both academic and non-academic settings using interdisciplinary, transdisciplinary, or multidisciplinary research approaches.
- b. **Analytical and Social Skills:** students are equipped with the mathematical and statistical tools and socio-cultural understanding necessary for their future careers.
- c. **Problem Solving Skills:** students are taught how to solve complex problems in economics/management/accounting through the application of their acquired technical tools and socio-cultural understanding, and the identification and correct use of data sources.
- d. **Presentation and Writing Skills:** students are equipped with the skills needed to present their work in both seminars and written format for the benefit of their future careers.

STUDENT ADMISSION

The New Student Admission System is carried out centrally at the university level by [Lembaga Pengembangan dan Penjaminan Mutu Pendidikan-LP2MP](#) (the Office of Development and Quality Assurance of Education). Enrollment period starts from January to July and the course starts on August each year. The REGISTRATION process is carried out ONLINE at the following website: <https://pmb.undip.ac.id/>

International Student: International students may enroll through either these two schemes:

- a) Regular Program: with this program, international students will join classes delivered in Bahasa Indonesia together with domestic students.
- b) International program: This program is fully delivered in English. Financing schemes is available for international students for this program through the Diponegoro International Student Scholarships (DISS), accessible at <https://io.undip.ac.id/undipscholarships/>.

To avoid problems of language barriers, International students are suggested to take Doctor by Research.

Admission procedures for international students for both Regular Programs and International Programs are managed by the Universitas Diponegoro International Office (accessible at: <https://io.undip.ac.id/>).

CURRICULUM

Structural Setup of the Doctoral Program

PDIE offers a research-based program in Economics with three major concentrations: accounting, management, and economics. The curriculum 2020 requires that students complete 47 SKS or credits (equal to 75.2 ECTS—the European Credit Transfer and Accumulation System—in which one SKS equals 2.83 hours x 14 weeks) to graduate and be awarded the degree of PhD in Economics. PDIE’s doctoral program consists of two main parts: 1) compulsory theoretical courses; and 2) research, publication and dissertation writing courses. This new curriculum is designed based on the new academic regulation requiring students to attend structured class with courses of 10 SKS (16 ECTS). This curriculum has been effectively implemented from August 2020.

Projected Study Time	6 semesters
Number of Credit Points	47 SKS (equal to 75.2 ECTS)
Workload per CP	1 SKS (credit) = 170 minutes/week x 14 weeks/semester x 1 hours/60 minutes = 40 hours/semester 1 SKS = 1.6 ECTS
Number of Modules	2 compulsory modules, 2-3 elective/concentration modules and 11 research-related modules
Time required for processing the final thesis	9 months

DOCTOR BY COURSE

Compulsory Courses/Modules (4 sks)

- a. Advanced Research Methodology in Economics- Management-Accounting (3 sks)
- b. Academic Writing and Publication (1 sks)

Elective/Concentration Courses/Modules (6 SKS):

Students should take 6 credits (SKS) of elective courses/modules offered in each concentration. The following Table describes each course for all concentration.

Major Concentration in Economics (3 Modules)	Major Concentration in Management (2 Modules)	Major Concentration in Accounting (2 Modules)
a) Advanced Micro Economics (2 sks) b) Advanced Macro Economics (2 sks) c) Advanced Development Economics (2 sks)	Marketing: a) Empirical Models in Marketing (3 sks) b) Current Issues in Marketing Theory (3 sks) Finance: a) Empirical Models in Finance (3 sks) b) Current Issues in Finance Theory (3 sks) Human Resources: a) Empirical Models in Human Resource Management (3 sks) b) Current Issues in Human Resource Management Theory (3 sks)	a) Current Issues in Accounting (3 sks) b) Multidisciplinary Research in Accounting (3 sks)

Research Courses/Module (37 SKS)

- a. Colloquium 1 (3 sks)
- b. Colloquium 2 (3 sks)
- c. Research Project 1: Literature Review (3 sks)
- d. Research Project 2: Qualification Exam (3 sks)
- e. Research Project 3: Proposal Exam (3 sks)
- f. Research Project 4: Research Finding Exam (3 sks)
- g. Research Project 5: Feasibility Exam of Dissertation (3 sks)
- h. Publication 1 (3 sk): International Conference
- i. Publication 2 (7 sks): Reputable International journals
- j. Dissertation (6 sks)

LEARNING SYSTEMS

Doctoral Degree Regulations

The PDIE programs are designed based on the National Standard for Higher Education (*Standar Nasional Pendidikan Tinggi*) and The Indonesian National Qualification Framework (*Kerangka Kualifikasi Nasional Indonesia-KKNI*) level 9. The Doctoral degree regulation is stated in Rector Regulation Number 5/2020 regarding Academic regulation for Postgraduate Programs at Diponegoro (amended by Rector Regulation of Universitas Diponegoro Number 29 of 2020). Students must complete 47 credits (74.2 ECTS) within their chosen program. Upon completion of these credits and producing a high-quality, original doctoral thesis and publishable research over a period of three years, students are awarded a PhD degree.

The program is a research-oriented program. The assessment of study progress is based on cumulative credits and grade point average. Students are required to fulfill the following learning steps:

Year	Learning Process
First Year	Attending the compulsory courses (10 SKS = 16 ECTS) required for all concentration.
Second to Third Years	<p>Publishing and conducting research activities (37 SKS = 59.2 ECTS), which is to consist of:</p> <ol style="list-style-type: none">Undertaking a series of research activities to produce a research proposal under two supervisors (promotor and co-promotor). The expectation is that this proposal will be for a piece of research that could form the basis of one chapter of a PhD dissertation. Students will be given an oral examination on this piece of work and must perform to a satisfactory standard.Presenting papers at an international conference and publishing at least one paper (for degree by coursework) or two papers (for degree by research) in reputable international journals. Assessment will be arranged by the course organizer.Completing an oral examination (viva) with four examiners - three internal to Universitas Diponegoro (not the supervisors or research advisor) and one external (from any other university) - after the submission of the PhD thesis. A successful thesis defense will result in the examiners recommending the awarding of the degree of PhD.

Status of Doctoral Students

The status of doctoral students is regulated by Rector Regulation of Universitas Diponegoro Number 5/2020 (amended by Rector Regulation of Universitas Diponegoro Number 29 of 2020). All registered doctoral students are full-time students. They are responsible for their own administrative and academic registration every semester and must obey all academic regulations and ethical codes. All doctoral students are required to attend courses (10 credit hours = 16 ECTS) in the first Semester. After that, students are also required to attend doctoral colloquiums, present papers at international

conferences and publish papers in reputable international journals. The Doctoral thesis should ideally be finished by the end of the third year, but all students have the right to take study leave (maximum 2 semesters). Doctoral students who fail to register administratively in two consecutive semesters will be considered to have dropped out of the program. All registered students will have full access to academic facilities, such as the internet, library, online journals, and Bloomberg data. All students will be evaluated every semester to assess their academic status and study progress. The result of this assessment will be used by PDIE to make decisions on student status and the need for any special treatment for students with an academic or non-academic issue.

Grading System

Grades for student performance will be awarded in accordance with the following scheme:

Grade	Mark	Description
A	80-100	High Distinction
B	75-79,9	Distinction
C	65-74,9	Credit
D	50-64,9	Pass
E	1-49,9	Fail
RP		Result Pending

EXAMINATION PROCEDURES

Examinations

Types of examination and level of performance in the examination is based on Rector Regulation of Universitas Diponegoro Number 5/2020 (amended by Rector Regulation of Universitas Diponegoro Number 29 of 2020). PDIE requires students to take a variety of different examinations: paper exams, seminar papers, a preliminary exam, a research proposal exam, a research finding exam and an oral examination of their doctoral thesis.

1. **Paper exams and seminar papers:** these types of exams assess the student's competence and skill in conceptual/theoretical aspects of core courses. All subjects require students to take paper exams and seminar papers; however, these exams may take on different forms, such as take-home exam or in-class exam, depending on the subject.
2. **Preliminary (Qualification) exam:** this exam assesses the student's competence and skills in identifying current issues in their research field of interest. Students are required to discuss the motivation of their research, identify phenomena and research gaps, and propose new ideas to demonstrate the novelty of their proposed research project. This exam can only be taken after a student has finished all core and elective courses in the 1st Semester and 2nd Semester. Three examiners (not including the student's supervisor) are assigned in the examination. This exam will decide the doctoral candidacy of the student.
3. **Research Proposal Exam:** This exam assesses the quality of a proposed research project and determines whether the proposed research project is acceptable for a doctoral thesis. Three examiners (not including the student's supervisor) are assigned to this exam.

4. **Research findings Exam:** This exam assesses the conceptual and methodological aspects of a research project and determines whether the research findings qualify for the minimum requirement of a doctoral thesis (i.e. the quality of the novelty, theoretical/empirical synthesis, research contribution, and academic writing). Four examiners (not including the student's supervisor) are assigned to this exam.
5. **Oral Examination of Doctoral Thesis:** This is the final exam taken after the submission of a dissertation. Students must complete an oral examination (viva) with four examiners, three internal to Universitas Diponegoro (not the supervisor or research advisor of the student), and one external (from any other university). The evaluation of oral examination is based on the following criteria:
 - a) The significance and contribution to knowledge of the undertaken research project.
 - b) The extent and depth of the candidate's scholarly awareness and use of related research findings.
 - c) The effectiveness of the research methodology used.
 - d) The trustworthiness of findings based on the research evidence.
 - e) The professional quality of the writing.

All examiners should submit separate and independent written examination reports before the viva exam, which will be combined into one decision report (known as by the *Berita Acara Ujian Promosi*) by the Exam Committee. One of the following decisions will then be made:

- a) To award the doctorate,
- b) To ask the student to 'revise and resubmit' the thesis, making any necessary (minor or major) amendments before it is accepted, or
- c) To award a down-graded qualification (certificate of participation in learning).

After a successful thesis defense, the examiners will recommend the awarding of the degree of PhD.

Organization of the Examination Procedure

The examination procedures, especially for paper exams, are included in the syllabi for the respective subjects. Examination procedures for PDIE are organized by the Academic Office of PDIE and based on the Manual of Examination Procedures and criteria stated in Rector Regulation of Universitas Diponegoro Number 5/2020 (amended by Rector Regulation Universitas Diponegoro Number 29 of 2020). All paper exams are organized in Mid Term and End Term sessions. Students must be registered during the exam session, with a minimum class attendance of 75%, or they will not be allowed to join the exam.

1. The Preliminary Exam, Research Proposal Exam, Research Findings Exam, and Oral (viva) Examination of the Doctoral Thesis can be done any time the student qualifies for the requirements of the exam. To take these exams, students must first apply online (using this link for preliminary, proposal, and research findings (or dissertation feasibility) and this link for the viva exam) or directly to the Academic Office of PDIE. The staff of the Academic Office will then distribute a list of exam applicants to the Head of PDIE to determine the examiners. These examiners will be sent an invitation letter, along with a proposal/dissertation and evaluation form, at least one week prior to examination day. On the examination day, staff prepare the room and manage the examination. Finally, after the examining committee has made and reported a decision on the results, staff will receive the examination reports (for all of the following exams: Preliminary, Research Proposal, Research Findings (feasibility), and Viva) and archive them for records of administrative and study progress evaluation.

Students facing disadvantages may apply for special accommodations and arrangements, in line with the disadvantage compensation policies of the university which are based on Rector Regulation of Universitas Diponegoro Number 5/2020 (amended by Rector Regulation of Universitas Diponegoro

Number 29 of 2020). Accommodations include exam modifications (extended time, alternative formats), alternative ways of completing assignments, and auxiliary aids and services. Compensation for disadvantages ensures that students with disabilities can take part in examinations on equal terms with those without. To ensure equal opportunities for everyone, students with an impairment must achieve the same academic standards to pass an examination as non-impaired fellow students. In other words, the compensations for disadvantages do not make it easier to pass examinations or give students unfair advantages. They only assist with the disadvantage experienced by the impaired students. Students can apply for such compensation to the Academic Office by including a supporting document for their request.

SCIENTIFIC SUPERVISION

Based on Rector Regulation of Universitas Diponegoro Number 5/2020 (amended by Rector Regulation of Universitas Diponegoro Number 29 of 2020) and the Manual of Supervisors Appointment, PDIE students who are enrolled as new students are required to immediately submit a proposal for an Academic advisor based on their research field. With consideration of the student proposals, the Head of PDIE appoints academic advisors as quickly as possible. Students are then required to write a dissertation proposal and present it in the Preliminary Examination. Before taking the Preliminary Examination, students must present their proposals in a colloquium (with two examiners). Colloquiums are scheduled semesterly.

Students who pass the Preliminary Examination are then required to propose their Thesis Supervisors (Promoter and Co-Promoter) to the Head of PDIE. Policies of PDIE state that the promoter must hold the position of professor and the co-promoter must possess a doctorate degree and have international publications, which are Scopus indexed at the least.

The responsibilities of the promoter and co-promoter are to ensure the student's 1) originality of dissertation and scientific contribution to research, 2) accuracy of research methodology and depth of reasoning, 3) systematic thinking and research conclusions, and 4) publication in international journals indexed by Scopus or Web of Science. When supervising dissertations and publications, the promoter and co-promoter should follow the Guidelines of Proposal and Dissertation Writing-in BAHASA (in English).

The Head of PDIE has the authority to replace the promoter and/or co-Promoter if there is an academic dispute between doctoral candidates and the promotor/co-promoter. Doctoral candidates are required to consult and regularly discuss their work with the promoter and co-promoter, at a frequency of at least four times in one semester. Activities pertaining to dissertation writing must be documented in a log book referred to as Buku Kendali Kegiatan Penulisan Disertasi & Publikasi Ilmiah (in ENGLISH)

TEACHING STAFF

Based on a regulation from the National Standards of Higher Education, teaching staff of doctoral programs need to hold doctoral degrees and have experience in education and research. As a result, PDIE has made a clear policy on the appointment of teaching staff. Teaching staff should not only hold doctoral degrees but also have certificates of professional teaching and examples of published scientific articles in international journals or active involvement in professional organizations. 15 teaching staff (or 44% of the teaching staff) have graduated from foreign universities. More specifically, staff members have graduated from the following universities: the University of Putra Malaysia (2 staff members); the University of *Sains*, Malaysia (2 staff members); Southern Cross University, Australia (one staff member); the University of Wollongong, Australia (three staff members); Macquarie University, Australia (one staff member), Curtin University of Technology, Australia (four staff

members), the University of Western Australia (one staff member), and Bonn University Germany (one staff member). The remaining teaching staff graduated from a top ten Indonesian university. Detailed scientific qualifications of teaching staff can be seen at this LINK: [Academic Qualification](#) and [List of Publications by teaching Staff](#).

SCHOLARSHIPS

Several scholarships both internally and externally are available for those who want to take the Doctoral Program in Economics at Universitas Diponegoro. The Scholarships available for PhD student may include:

1. **Indonesia Endowment Fund for Education**, abbreviated as LPDP (*Lembaga Pengelola Dana Pendidikan*), is a full-ride scholarship from the Indonesian Ministry of Finance for all Indonesian citizens. LPDP has a vision to be the best regional fund management institution to prepare future leaders and encourage innovation for a prosperous, democratic and just Indonesia. The LPDP service program consists of scholarships, research funding, and fund management (investment). This scholarship can be accessed at <https://www.lpdp.kemenkeu.go.id/in/page/Beasiswa2021>.
2. **Beasiswa Unggulan Kemendikbud** (Outstanding Achievement Scholarships) provide those who excel or have special talents with the opportunity to take undergraduate, postgraduate, and doctoral studies but have difficulty in financing their education. This Scholarship is the government's support and effort in reducing the gap in education levels of the community. Therefore, the government provides three types of Scholarships, namely:
 - a) **Beasiswa Unggulan Masyarakat Berprestasi** (Scholarship for those who have special talent or outstanding achievement)
 - b) **Beasiswa Unggulan 3T: Terluar, Tertinggal, Terdepan** (Scholarship for those who live in frontier, outermost and least developed regions)
 - c) **Beasiswa Unggulan Pegawai Kemendikbud** (scholarship for those who work at the units under the Ministry of Education, Culture, Research and Technology Republic of Indonesia)
This scholarship may be accessed on the following link:
<https://buonline.beasiswaunggulan.kemdikbud.go.id/>
3. **Masters Education Scholarship Towards Doctorate for Excellent Undergraduates (PMDSU)**. PMDSU scholarships are organized by the Ministry of Education, Culture, Research, and Technology. It has been offered since 2013, and has now reached Batch VI. Undip is one of the partner universities for this scholarship. This scholarship is offered annually and accessible at <https://www.pmdsu.com/> . PMDSU scholarships are also organized by Diponegoro University internally, with almost the same scheme.
4. **Beasiswa Kemitraan Negara Berkembang (Developing Countries Partnership Scholarship)**, popularly known as KNB Scholarship, is a prestigious scholarship program offered by the government of Republic of Indonesia to selected applicants originating from developing countries. Managed by the Directorate General of Higher Education, the Ministry of Education, Culture, Research, and Technology the scholarship has been disbursed since 2008 to 1,290 recipients from 94 countries. There are 23 universities as partners for this scholarship, one of which is Diponegoro University. Complete information on this scholarship can be accessed at: <http://knb.kemdikbud.go.id/>

Please note that information about scholarship changes at times and students should check directly with the government office responsible for the program for up-to-date information

FACILITIES

Classrooms and Working Spaces

PDIE is committed to offering high-quality learning environments through the provision of excellent classrooms, IT equipment, workplaces (cubical rooms) and other supporting facilities. PDIE also has laboratories (statistics, computers, Arbutus, Bloomberg, and capital market) to support doctoral students to finish their studies. Classrooms and labs can be accessed by doctoral students from 08.00 to 18.00. However, working spaces for students (cubical rooms) can be accessed 24 hours a day, seven days a week. All rooms and labs are equipped with internet access and multimedia capabilities in line with the needs of the study program. PDIE also offers discussion rooms that allow students to conduct research and discussions in a more informal environment than the classroom.

All rooms are supported by up-to-date technology and equipment and Wi-Fi coverage is available across the whole University. This facility is available free of charge and enables teaching staff and students to readily use the Internet resources and internal university services.

Importantly, all classrooms, working spaces and other facilities are appropriately equipped for disabled students giving them barrier-free access. PDIE provides services and accommodations for students with disabilities, such as lifts, ramps and parking spaces, who present documentation of their condition.

Library Materials (Literature, Magazines, Databases)

PDIE provides doctoral students with literature, magazines, and databases which are available in the Faculty Library and the University Library. PDIE, through the faculty (database) library, provides more than 16,954 book titles (30,428 copies). The University Library provides students with online access to e-books, e-journals, articles, and periodical publications. Books in Bahasa Indonesia and English are both available. During the semester, the regular library service hours are Monday to Friday, 08:00 – 18:00. Qualified library staff (led by a PhD librarian) are available to help students search for necessary books or journals or to access international databases. Access to relevant digital media, especially e-books and e-journals (i.e. ABI/Informa Global, Proquest, Oxford Journal, Jstor, Cambridge Journal, Science Direct, Springer, Emerald Insight and Ebsco Discovery Service), is also possible from the students' home using an SSO account. PDIE also provides a database for research in economics, management and accounting accessible by students and teaching staff in the Bloomberg Lab.

Technical Offers

PDIE provides students with a variety of topic specific technical support to enrich course material. Students are required to be actively involved in academic forums, such as conferences, seminars, and workshops. Students also receive software utilization training (such as EndNote, Mendeley, SPSS, EVIEW, STATA, LISREL, AMOS, and PLS Warp) to support their research and publications. A colloquium is also held every semester with the aim of encouraging students to complete their dissertations as soon as possible.
